INNOVATIVE FEATURES

With over 80 years of innovations Tylon is continually developing new innovative products that provide solutions for our customers in the field. One of our recent innovations is the configurable Microwave Rotatable Dish Mount Kit. It provides a simple and cost effective universal mounting options with the flexibility to turn 180° for any mobility azimuth. Each kit includes hardware for tapered and non-tapered towers.

1. Configurable Orientation
2. Versatile Design
3. Microwave Dish Flexibility
4. Universal Interface

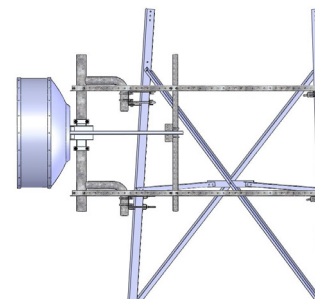

1. Configurable Orientation

- The mount has 180° turning radius which allows the dish up to a 146° turning radius creating mobility azimuth
- Replaces more expensive face mounts
- Easier orientation

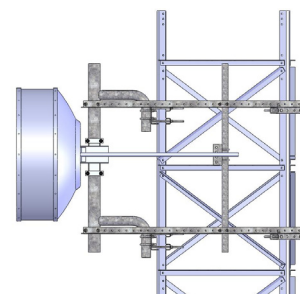

2. Versatile Design

- Quick and easy to install
- Ideal for self-support and guyed towers
- Includes adjustable tie-back to fit any standard tower face width
- Includes two universal tower interfaces, 4-1/2"Ø x 6' mount pipe, mount strut, 2-3/8"Ø vertical pipe to secure dish struts

Tapered

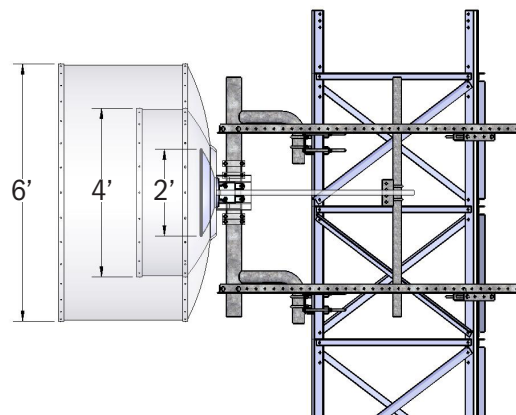

Non-Tapered

INNOVATIVE FEATURES

3. Microwave Dish Flexibility

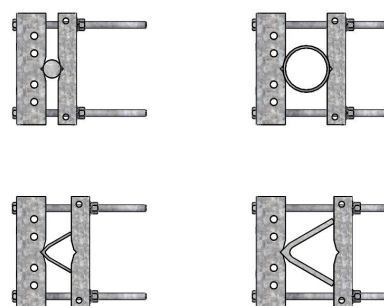

- Supports one microwave dish
- Fits 2 ft., 4 ft. or 6 ft. microwave dishes

4. Universal Interface

- Designed to fit round and angle members
- Significant costs savings since face mounts are not needed
- Maximum round leg sizes fit 1-1/4"Ø to 6-5/8"Ø round
- Maximum angle leg sizes fit 6" for 60° angles or 5" for 90° angles

Fits 1-1/4"Ø to 6-5/8"Ø (round legs)

Fits a maximum 6" for 60° angles or 5" for 90° angles (angle legs)
